

PF-35™ Oil for Top of Rail

PF-35™ is a top-of-rail product specifically designed to provide optimum friction at the wheel-rail interface at hump yards. TOR Armor™ substantially reduces noise and wear. It ensures that cars roll freely and prevents stop-shorts.

PF-35™ contains no solvents, water or metallic additives. It will not corrode holding tanks, pumps or other applicator components.

PF-35™ is based on white mineral oil that has been highly refined, removing sulfur and other contaminants. This type of oil is inherently biodegradable.

BENEFITS:

- WEAR - Reduces creep, hunting (also known as yaw), and corrugations.
- NOISE - Stops or substantially reduces high-pitched squeal.
- QUIET - Smoother, quieter ride for transit customers.
- ALL SEASON - A single grade for year-round use in many areas.
- SAFE - contains no heavy metals, petroleum solvent or hazardous ingredients.

APPLICATIONS:

PF-35™ optimizes friction at the wheel / rail interface. It is suitable for use in hump yards and on both freight and transit rail.

PF-35™ is also useful as a switch plate lubricant, particularly where there is contamination from sand or grinding particles.

CHARACTERISTICS		
Grade Name	PF-35™	PF-35™ All Season
Appearance	Clear with slight yellow tint	Blue fluid
Rust Test (ASTM 665)	Pass	Pass
Density, lb/gal @ 60°F	7.20	7.00
Lowest Usable Temperature, °F (°C)	0°F (-18°C)	-25°F (-31°C)

PACKAGING

Non-returnable Totes	Drums	Pails
